14 II.

15 **NATURE OF THE ACTION**

16 4. This is an action for patent infringement.

17 5. Rambus is informed and believes, and thereupon alleges, that MediaTek has been
18 and/or is infringing, contributing to the infringement of, and/or actively inducing others to infringe
19 claims of U.S. Patent No. 6,034,918 (the "'918 Patent"), U.S. Patent No. 6,038,195 (the "'195

JURISDICTION AND VENUE

6. This action arises under the patent laws of the United States, 35 U.S.C. § 1 *et seq.*, including 35 U.S.C. § 271. This Court has subject matter jurisdiction pursuant to 28 U.S.C. §§ 1331 and 1338(a).

7. This Court has personal jurisdiction over MediaTek because MediaTek has substantial contacts and conducts business in the State of California and in this judicial district, and has been infringing, contributing to the infringement of and/or actively inducing others to infringe claims of the Asserted Patents in California and elsewhere.

8. Venue is proper in this Court pursuant to 28 U.S.C. §§ 1391(b), 1391(c), 1391(d) and/or 1400(b) because a substantial part of the events giving rise to Rambus's claims occurred in the Northern District of California and because MediaTek is subject to personal jurisdiction in the Northern District of California.

IV.

FACTUAL BACKGROUND

A. Rambus

9. Rambus is one of the world's leading designers of semiconductor interface technologies that are used in a broad range of consumer, computing, and communications applications. In addition to the development of high-speed interfaces, Rambus's breakthrough technology and unparalleled engineering expertise have solved the most challenging interface problems and have brought industry-leading products to market. Rambus's interface solutions have enabled state-of-the-art performance in many products, such as personal computers, workstations, servers, gaming consoles, televisions, Blu-ray players, set-top boxes, printers, video projectors, network switches, modems, routers, mobile phones, and graphics cards.

10. In the late 1980s, Michael Farmwald and Mark Horowitz, the founders of Rambus, recognized and set out to solve the "memory bottleneck problem," the failure of memory interfaces to keep pace with the exponential growth in microprocessor speed. Farmwald and Horowitz's inventions enabled a dynamic random access memory (DRAM) memory architecture that achieved

1 data transmission rates of 500 megahertz, at a time when other DRAM chips were running in the
2 range of 20-30 megahertz.

3 11. Since its founding in 1990, Rambus has continued to design, develop, market, and
4 license its high speed interface technology. Rambus's inventions include new memory devices, new
5 controllers for controlling such memory devices, and new systems incorporating those memory
6 devices and memory controllers. Rambus's inventions also include new transmitters and receivers
7 and interface technology.

8 12. Rambus has made large-scale investments in the exploitation of its technology and a
9 large number of companies have paid for licenses to its patents. Rambus has granted licenses of
10 varying scope to its technology to many of the world's largest semiconductor manufacturers.

11 13. Since 1990, Rambus has spent millions of dollars on research and development of its
12 valuable technology. Rambus relies on the United States patent system to protect the technology
13 resulting from its research and development. Rambus's continued success depends on its research
14 and development of memory interface and other solutions, as well as the protection of intellectual
15 property in its innovative technology.

16 **B. Asserted Patents**

17 14. On April 18, 1990, U.S. Patent Application No. 07/510,898 was filed naming Michael
18 Farmwald and Mark Horowitz as inventors. The Asserted Patents claiming priority to this
19 application are referred to herein as the "Farmwald/Horowitz Patents."

20 15. On October 19, 1995, U.S. Patent Application No. 08/545,292 was filed naming
21 Richard M. Barth and other individuals as inventors. The Asserted Patents claiming priority to this
22 application are referred to herein as the "Barth Patents."

23 **1. Farmwald/Horowitz Patents**

24 16. On March 7, 2000, U.S. Patent No. 6,034,918, titled "Method of Operating a Memory
25 Having a Variable Data Output Length and a Programmable Register," was duly and legally issued
26 to Rambus, as assignee of named inventors Michael Farmwald and Mark Horowitz.

1 17. On March 14, 2000, U.S. Patent No. 6,038,195, titled "Synchronous Memory Device
2 Having a Delay Time Register and Method of Operating Same," was duly and legally issued to
3 Rambus, as assignee of named inventors Michael Farmwald and Mark Horowitz.

4 18. On July 10, 2001, U.S. Patent No. 6,260,097, titled "Method and Apparatus for
5 Controlling a Synchronous Memory Device," was duly and legally issued to Rambus, as assignee of
6 named inventors Michael Farmwald and Mark Horowitz.

7 19. On October 16, 2001, U.S. Patent No. 6,304,937, titled "Method of Operation of a
8 Memory Controller," was duly and legally issued to Rambus, as assignee of named inventors
9 Michael Farmwald and Mark Horowitz.

10 20. On July 30, 2002, U.S. Patent No. 6,426,916, titled "Memory Device Having a
11 Variable Data Output Length and a Programmable Register," was duly and legally issued to
12 Rambus, as assignee of named inventors Michael Farmwald and Mark Horowitz.

13 21. On June 24, 2003, U.S. Patent No. 6,584,037, titled "Memory Device Which Samples
14 Data After an Amount of Time Expires," was duly and legally issued to Rambus, as assignee of
15 named inventors Michael Farmwald and Mark Horowitz.

16 22. On March 30, 2004, U.S. Patent No. 6,715,020, titled "Synchronous Integrated
17 Circuit Device," was duly and legally issued to Rambus, as assignee of named inventors Michael
18 Farmwald and Mark Horowitz.

19 23. On June 15, 2004, U.S. Patent No. 6,751,696, titled "Memory Device Having a
20 Programmable Register," was duly and legally issued to Rambus, as assignee of named inventors
21 Michael Farmwald and Mark Horowitz.

22 24. On April 24, 2007, U.S. Patent No. 7,209,997, titled "Controller Device and Method
23 for Operating Same," was duly and legally issued to Rambus, as assignee of named inventors
24 Michael Farmwald and Mark Horowitz.

25 25. The Farmwald/Horowitz Patents include claims directed to improving the
26 performance of memory controllers.

27 26. At all relevant times, Rambus has been the owner of the entire right, title, and interest
28 in each of the Farmwald/Horowitz Patents.

1 **2. Barth Patents**

2 27. On July 8, 2003, U.S. Patent No. 6,591,353, titled "Protocol for Communication with
3 Dynamic Memory," was duly and legally issued to Rambus, as assignee of Richard M. Barth and the
4 other inventors named therein.

5 28. On October 23, 2007, U.S. Patent No. 7,287,109, titled "Method of Controlling a
6 Memory Device Having a Memory Core," was duly and legally issued to Rambus, as assignee of
7 Richard M. Barth and the other inventors named therein.

8 29. The Barth Patents include claims directed to improving the performance of memory
9 controllers.

10 30. At all relevant times, Rambus has been the owner of the entire right, title, and interest
11 in each of the Barth Patents.

12 **C. MediaTek's Acts of Infringement**

13 31. Rambus is informed and believes, and thereupon alleges, that MediaTek has made,
14 used, sold, imported and/or offered for sale, and/or continued to make, use, sell, import and/or offer
15 for sale, products in the United States consisting of or including DRAM memory controllers,
16 including SDR (Single Data Rate) memory controllers, DDR-type memory controllers (including
17 DDR or Double Data Rate memory controllers, and DDR2 or Double Data Rate 2 memory
18 controllers), GDDR-type memory controllers (including GDDR3 or Graphic Double Data Rate 3
19 memory controllers), and mobile and/or low power versions of the aforementioned memory
20 controllers.

21 32. The aforementioned MediaTek products are hereinafter referred to collectively as the
22 "Accused Products." The Accused Products include at least products that are part of, for example,
23 MediaTek's Digital Consumer DVD, DTV, and PC Optical Storage Drive product lines.

24 33. MediaTek's making, use, sale, offers for sale, and/or importation of the Accused
25 Products in the United States constitute acts of direct infringement of the Asserted Patents.

26 34. In November 2005, Rambus contacted MediaTek to discuss licensing of Rambus
27 patents. On or about December 15, 2005, Rambus provided information to MediaTek regarding the
28

1 infringement of the '918 Patent, the '195 Patent, the '097 Patent, the '937 Patent, the '916 Patent, the
2 '020 Patent, and the '696 Patent by MediaTek products.

3 35. Rambus is informed and believes, and thereupon alleges, that MediaTek's knowing
4 infringement has continued despite further information regarding infringement provided by Rambus
5 in the course of attempting to negotiate a license with MediaTek that would fairly compensate
6 Rambus for MediaTek's use of patents owned by Rambus. For example, on or about March 27,
7 2006, Rambus provided further information to MediaTek regarding the infringement of the '918
8 Patent, the '195 Patent, the '097 Patent, the '937 Patent, the '916 Patent, the '020 Patent, and the
9 '696 Patent by MediaTek products.

10 36. Rambus is informed and believes, and thereupon alleges, that MediaTek has sold or
11 offered to sell its Accused Products to third parties who incorporate the Accused Products into their
12 own products. Those third parties in turn have made, used, sold, offered for sale, and/or imported
13 and/or continue to make, use, sell, offer for sale, and/or import their own products in the United
14 States. These activities undertaken by the third parties constitute acts of direct infringement of the
15 Asserted Patents. The memory controllers in MediaTek's Accused Products are known by
16 MediaTek to be especially made or especially adapted for use in infringement of the Asserted
17 Patents and are not staple articles or commodities of commerce suitable for substantial non-
18 infringing use. MediaTek has thereby contributed to and continues to contribute to the infringement
19 of the Asserted Patents.

20 37. Rambus is informed and believes, and thereupon alleges, that, by its sales and/or
21 offers for sale of the Accused Products to third parties, MediaTek also has induced and continues to
22 induce acts by third parties that MediaTek knew or should have known would constitute direct
23 infringement of the Asserted Patents. MediaTek actively induces infringement of the Asserted
24 Patents by designing the Accused Products to be capable of infringement and by promoting and
25 encouraging the use of its products by the third parties in ways that infringe the Asserted Patents.

26 38. Rambus is entitled to recover from MediaTek the actual damages it sustained as a
27 result of MediaTek's wrongful acts alleged herein under 35 U.S.C. § 284 in an amount to be proven
28 at trial, together with interest and costs.

39. Rambus is informed and believes, and thereupon alleges, that MediaTek's infringement of the Asserted Patents as set forth herein has been and is willful, deliberate and in disregard of the patent rights of Rambus, and Rambus is therefore entitled to increased damages up to three times the amount of actual damages and attorneys' fees, pursuant to 35 U.S.C. §§ 284, 285.

40. MediaTek's infringement of the Asserted Patents will continue to damage Rambus, causing irreparable harm for which there is no adequate remedy at law, unless it is enjoined by this Court.
